

This Macromedia authorized training course introduces you to Dreamweaver Coursebuilder. Coursebuilder for Dreamweaver are a powerful set of extensions that allow you to create complex Web-based learning without plug-ins or applets. Coursebuilder for Dreamweaver lets you define a complete Web-based learning interaction.

This curriculum provides 8 hours of instructor-led content, designed to be taught in a 1-day class. Each lesson begins with a list of learning objectives to provide an overview of the section. Step-by-step instructions then guide you through a set of Coursebuilder for Dreamweaver functions. All of the lessons feature sample HTML pages and graphics to make it easy for you to follow the step-by-step exercises. These completed sample files are included in the Done folder on the CD that comes with each book so you can easily follow along with the lessons. As you complete each lesson, you'll learn valuable skills you can use to create any Web learning project.
